

Learn How to Make Iris Fold Notecards with Linda Weaver

Iris folding is a paper craft technique that involves folding strips of colored papers in such a way to form a design. The center of the design forms an *iris*, a shape reminiscent of the iris diaphragm of a camera lens.

Each card is uniquely made with its own special colored paper combinations. Please note that the swirl of each separate color leads to the center iris. Each card is one-of-a-kind...no two are alike.

You will leave the class with two beautiful completed cards and additional information to make cards at home. Lots of fun!
